

Wireless for Commercial Security

For commercial buildings and campus-based coverage, Inovonics wireless intrusion detection devices, panic alarms and scalable network integrates easily into access control, intrusion and video management systems.

Simple and Flexible Integration

Through a variety of RF gateways, Inovonics wireless devices can be added to virtually any intrusion, access or video management system (VMS).

Integrating Devices

Serial Receivers

Serial receivers use a predefined and matched serial data stream as input to Intrusion, Access or VMS's.

EN4200: Refer to Panel Partners for product details.

Add-On Receivers

Add-on receivers use hardwired form C relays as inputs to Intrusion, Access or VMS's.

EN4232MR, EN4216MR, EN4204R

Receiver	Transmitters	Outputs	
		Alarm	Fault
EN4204R cUL _{us}	4	4	1
EN4216MR cUL _{us}	16	5	1 ⁽²⁾
EN4232MR cUL _{us}	32	11	1 ⁽²⁾

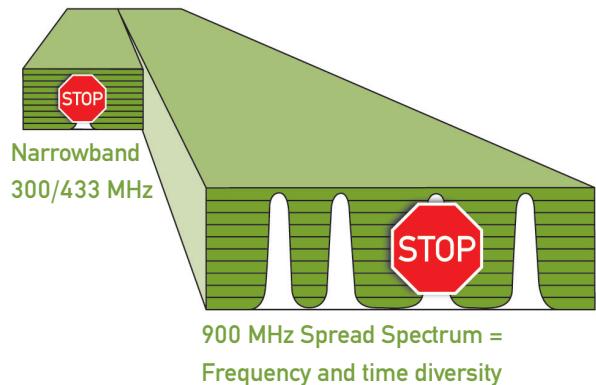

(1) Serial interface supports multi-condition pendants (2) User assigned fault outputs

(3) EN4200 may have a different part number and must be purchased through system integration partners

Mission Critical Reliability For Panic Alarm Signalling

The Inovonics commercial mesh network uses a frequency-hopping, spread-spectrum technology that sends redundant messages across multiple channels to avoid interference obstacles. The scalability of the network is provided by high-power repeaters that auto-configure to receive, decode, prioritize and retransmit signals from wireless transmitters. In short, repeaters act as multi-path range expanders to provide wireless coverage in commercial buildings and across campuses.

Designed to move small amounts of data over a moderate range. Inovonics network offers a key functional advantage in that, the panic button gives mobile employees the ability to trigger an alarm from anywhere coverage is provided.

Inovonics Network

Transmitter

Detects and sends sensor and alarm state of health messages.

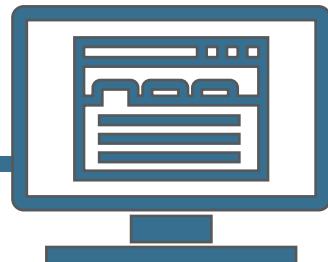

Repeater

Extends coverage area by auto-configuring mesh network.

Receiver

Prioritizes alarms, alerts and state of health messages and relays them to the head-end application.

Your Network

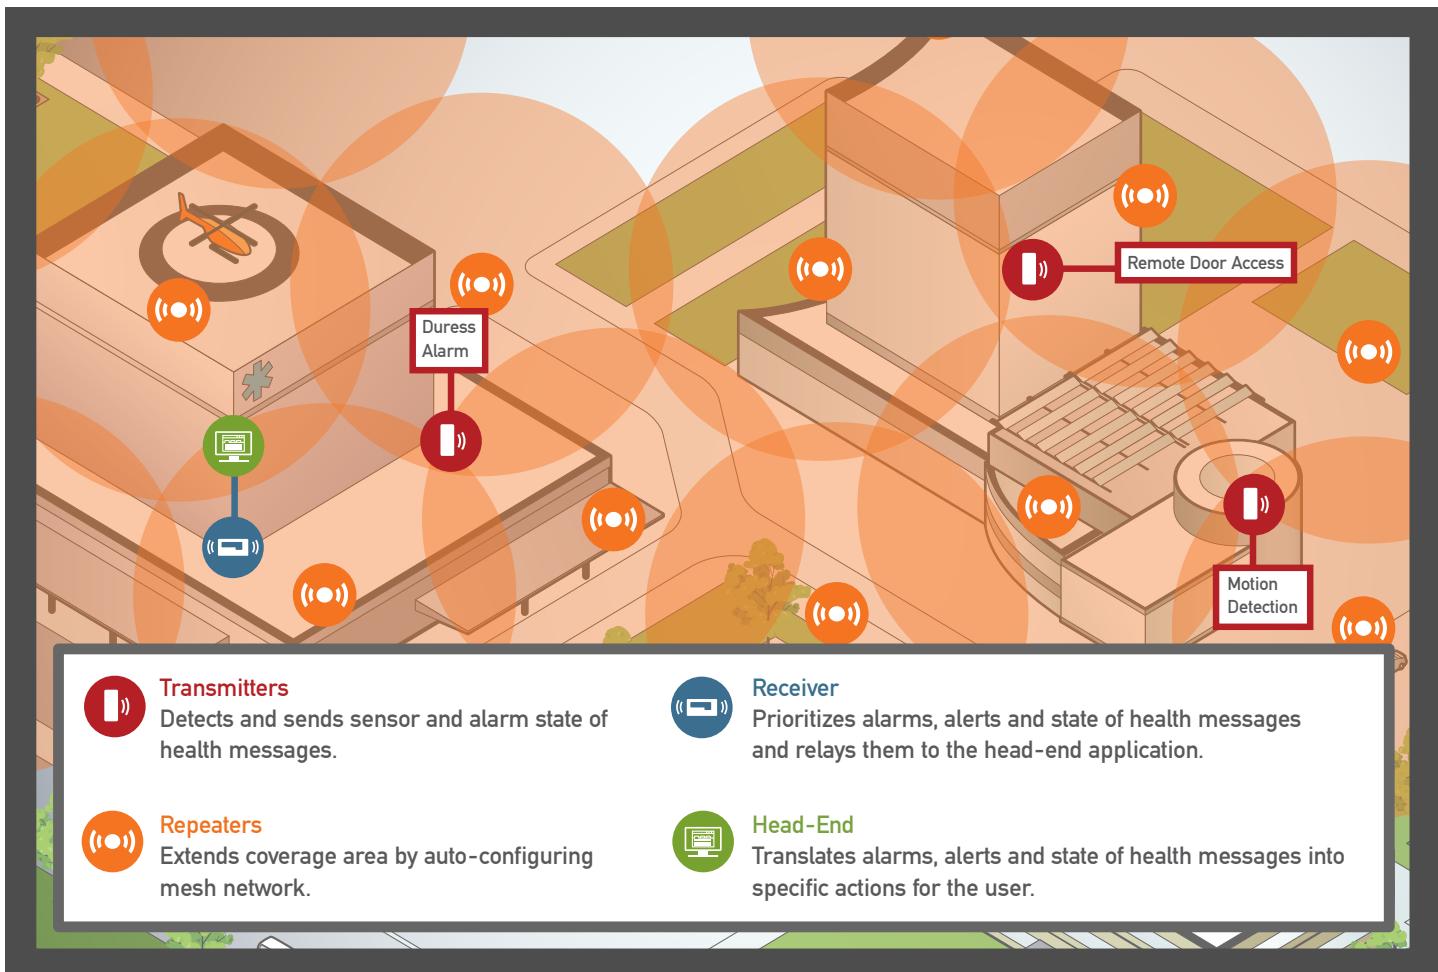

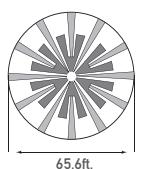

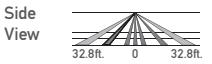

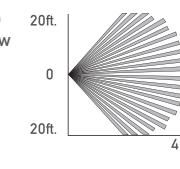

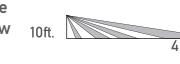

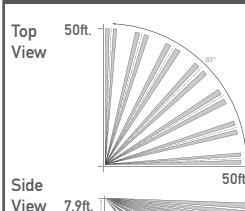

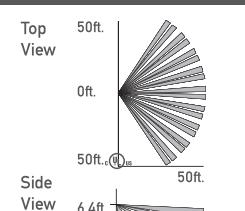

Head-End Application

Translates alarms, alerts and state of health messages into specific actions for the user.

Single Facility to Campus-Wide Coverage

The Inovonics network is scalable to cover areas from square feet to acres, providing coverage for large commercial buildings as well as multi-building campuses. For 30 years, Inovonics has covered government facilities, historic and national landmarks, critical infrastructure facilities, K-12 schools, banks, hospitals, and retail establishments.

Water Resistant Pendant Transmitters Compact single or double button pendant that can be supervised. LED flashes when transmitting. Ideal for healthcare applications. Single Button EN1223S Double Button EN1223D  Wristband ACC623	Necklace Pendant Transmitters Sleek single or double button pendant that can be supervised. LED flashes when transmitting. Easy to wear with included necklace. Single Button EN1233S Double Button EN1233D 	Belt Clip Pendant Transmitters Sleek single or double button pendant that can be supervised. LED flashes when transmitting. Durable belt clip included. Single Button EN1235S Double Button EN1235D 	Fixed Position Hold Up Pendant Transmitters Fixed position transmitters include mounting hardware for easy installation and back tamper for removal alarms. Single Button EN1235SF Double Button EN1235DF 	Four Condition Pendant Transmitters Multiple condition pendants require the use of a multi-condition receiver and application designed to support advanced functionality. Four Condition EN1224 Four Condition On/Off EN1224-ON 												
Multi Condition Pendant Transmitters Multiple condition pendants require the use of a multi-condition receiver and application designed to support advanced functionality. Three Condition EN1236D Two Condition EN1238D 	Universal Transmitters Universal transmitters can be used with any standard N/O or N/C sensor and include a case tamper switch. Universal Transmitter EN1210 With EOL Resistor EN1210EOL Door/Window Transmitter with Reed Switch EN1210W 	Universal Transmitters with Wall Tamper Wall tamper switch adds protection from device removal. Universal Transmitter with Wall Tamper EN1215EOL With Reed Switch and Magnet EN1215WEOL 	Dual Input Universal Transmitter Dual input universal transmitters can be used with any standard N/O or N/C sensor and include an additional N/C input. Dual Input Universal Transmitter EN1212 With Wall Tamper EN1216 Long Range EN1252 	Smoke Detector The EN1244 features an onboard sounder, an LED indicator, tamper, EchoStream® network supervision, and local test capability. 												
Wireless CO Detector The EN1245 features an onboard sounder, a CO sensor, LED indicators and local test capability to allow the user total visibility of its functionality. 	Billtrap Transmitter The EN1249 provides the flexibility for use in cash drawers for use in any financial or retail environment. Features case and back tamper, Smart Baiting with LED confirmation, and two or ten second delay transmission modes. 	Glassbreak Detector The EN1247 uses acoustic pattern recognition technology for proven performance, extended range, and increased immunity to false alarms. 20ft radius allows for multiple window coverage. 	Water Detector The EN1751 water detector provides early warning against damage caused by leaking appliances and standing water when used with the Honeywell® FP280 or Flair Electronics® 1010-H2OS36-EN1751 Probes sold separately. 	Temperature Detector The EN1752 temperature detector enables programmable temperature threshold alarming for ambient temperatures and external monitoring when used with the Honeywell® T280R temperature probe. 												
360° Ceiling Mount Motion Detector The EN1265 four element motion detector offers a 360° coverage pattern, case tamper switch, and up to an 18ft mounting height with the included lens. High Ceiling Lens (25ft) ACC669 	360° Ceiling Mount Motion Detector Coverage Top View  Side View 	Motion Detector with Pet Immunity The EN1262 is designed for low traffic applications and features pet immunity to reduce false alarms from animals. Includes a case tamper switch and optional wall tamper. 	Motion Detector with Pet Immunity Coverage Top View  Side View 	High Traffic Four Element Motion Detector The EN1261HT is developed specifically for high-traffic environments delivering approximately four years of battery life. Includes case and back tamper, and features pet immunity up to 33lbs/lft. Long Range Lens (60ft) ACC668 												
High Traffic Four Element Motion Detector Coverage Top View  Side View 	Wall Mount Motion Detector The EN1260 features digital signal processing that recognizes human signatures to reduce false alarms. Curtain Lens Kit ACC672CT Long Range Lens Kit (9ft) ACC672LR Pet Alley Lens Kit ACC672PA 	Wall Mount Motion Detector Coverage Top View  Side View 	Add-On Receivers Add-on receivers cost effectively add EchoStream wireless transmitters to any installation. Includes form C relays with dedicated alarm and fault output. The EN4216MR and EN4232MR are UL listed, support multi-condition transmitters, and include event logging.	<table border="1"> <thead> <tr> <th>Receiver</th> <th>Transmitters</th> <th>Outputs</th> </tr> </thead> <tbody> <tr> <td>EN4204R</td> <td>4</td> <td>4 Alarm / 1 Fault</td> </tr> <tr> <td>EN4216MR</td> <td>16</td> <td>5 Alarm / 1 Fault</td> </tr> <tr> <td>EN4232MR</td> <td>32</td> <td>11 Alarm / 1 Fault</td> </tr> </tbody> </table> 	Receiver	Transmitters	Outputs	EN4204R	4	4 Alarm / 1 Fault	EN4216MR	16	5 Alarm / 1 Fault	EN4232MR	32	11 Alarm / 1 Fault

Serial Receivers - Direct to Panel Integration Serial receivers integrate directly to partner panels used in commercial access control/intrusion. These integrations leverage programming and wiring familiarity to expedite inclusion, or expansion, of wireless end points. Panel integration list on front 	High Power Repeater The high power repeater amplifies transmissions from any transmitter. High Power Repeater with Transformer EN5040-T 	Survey Receiver The EN4016SK survey receiver is a portable and easy to use tool for determining the optimal location for transmitters and repeaters. Reduce bid risk, decrease installation time, and build credibility with clients. Without Transformer EN5040 Weatherproof Enclosure ACC650 	Survey Transmitters Survey transmitters are used with the EN4016SK survey receiver to help determine optimal location for transmitters and repeaters. Survey Universal EN1210SK Survey Pendant EN1223SK 	Survey Kit & App The EN0107 survey kit and app reduces bid risk, decreases installation time, and builds credibility with clients. Quickly prepare accurate quotes for even the most complex jobs. Mobile app available on Android and iOS devices. 												

The range and performance of any wireless product depends on the structure and environment in which it operates. Continual enhancements to our products may cause specifications to change without notice. Visit our website for UL information.
