

INOVONICS® AuthorizedPlus Submetering Partner Program

Program Details

Introducing the new Inovonics AuthorizedPlus Submetering Partner Program. This program allows Inovonics MultiFamily Submetering partners to promote their technician's ability to expertly install and maintain Inovonics Submetering systems.

After completing an in-depth training, partners are permitted to use the AuthorizedPlus logo and will be listed as expert AuthorizedPlus partners on the Inovonics website. To qualify, company technicians must participate in a half-day training session, held either at the Inovonics facility (in Louisville, Colorado) or at their own office or off-site location of choice. Webinar sessions are available, but due to the hands on nature and time frame involved, face-to-face training is encouraged.

After completing the training each participant must pass a test to achieve AuthorizedPlus status. All participating employees will receive a certificate. Additionally Inovonics will promote the partner on the Inovonics website, with a custom entry including the partner's:

- Logo
- About us text
- Contact information (email, phone, web and social media)

HOW TO BUY – MULTI-FAMILY SUBMETERING
Submetering Partners and Distributors

Are you a multifamily property owner interested in making sure your submetering hardware is expertly installed and maintained? Or a utility billing provider interested in outsourcing the hardware components of a submetering system? Here you can find a searchable database of Inovonics submetering Authorized and AuthorizedPlus partners to identify the best one to meet your needs.

Authorized partners have received training to ensure they are familiar with the Inovonics submetering solution. In addition to this basic training AuthorizedPlus partners have received in-depth training and passed certification testing.

If you need help in identifying the right partner to best meet your needs or if you're a submetering provider interested in becoming an Authorized or Authorized plus partner, please contact the Inovonics account manager for your region.

The Benefits

Submetering installers and utility billing providers interested in differentiating their solution based on their installation and maintenance expertise gain a tangible means to validate their capabilities.

Multifamily housing property owners and developers gain the ability to protect their submetering hardware investment, knowing it has been expertly installed and maintained throughout its warranty period and beyond.

Utility billing providers wanting to focus on their core software business gain a directory of expert resources should they chose to outsource the hardware components and installation of a submetering system.
