

## Flexible Integration

Inovonics commercial fire devices operate on the scalable Inovonics network, designed to integrate easily into fire alarm systems. The same unbeatable wireless, UL864 listed and CSFM approved.

Inovonics wireless devices can be easily added to most commercial fire alarm systems using Inovonics RF gateways.

## Integrating Device

### Add-On Receiver

Add-on receivers use hardwired form C relays as inputs to commercial fire alarm systems.

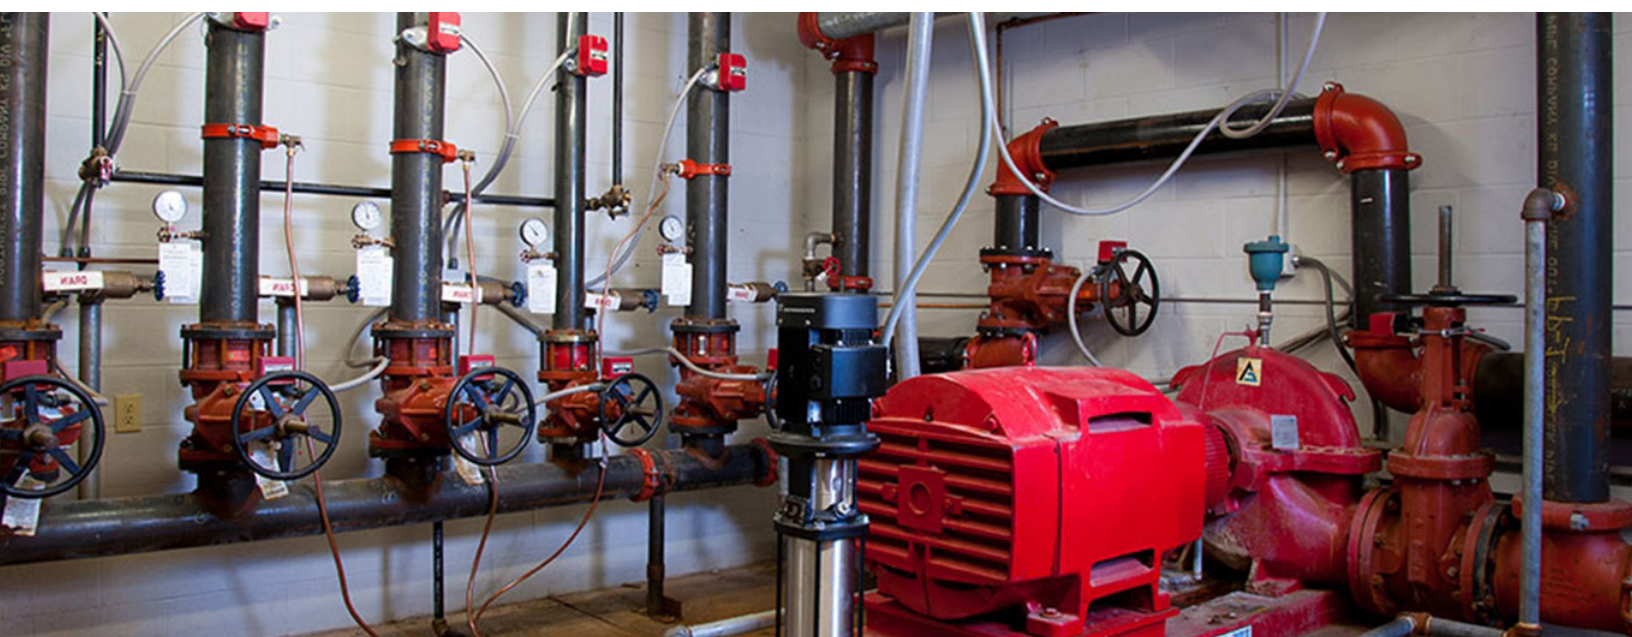

EH4104R: Refer to Other Commercial Panels for product details.

### Other Commercial Panels - Add On Receivers <sup>(1)</sup>

Connect almost any panel I/O device through the receivers form C relay outputs.

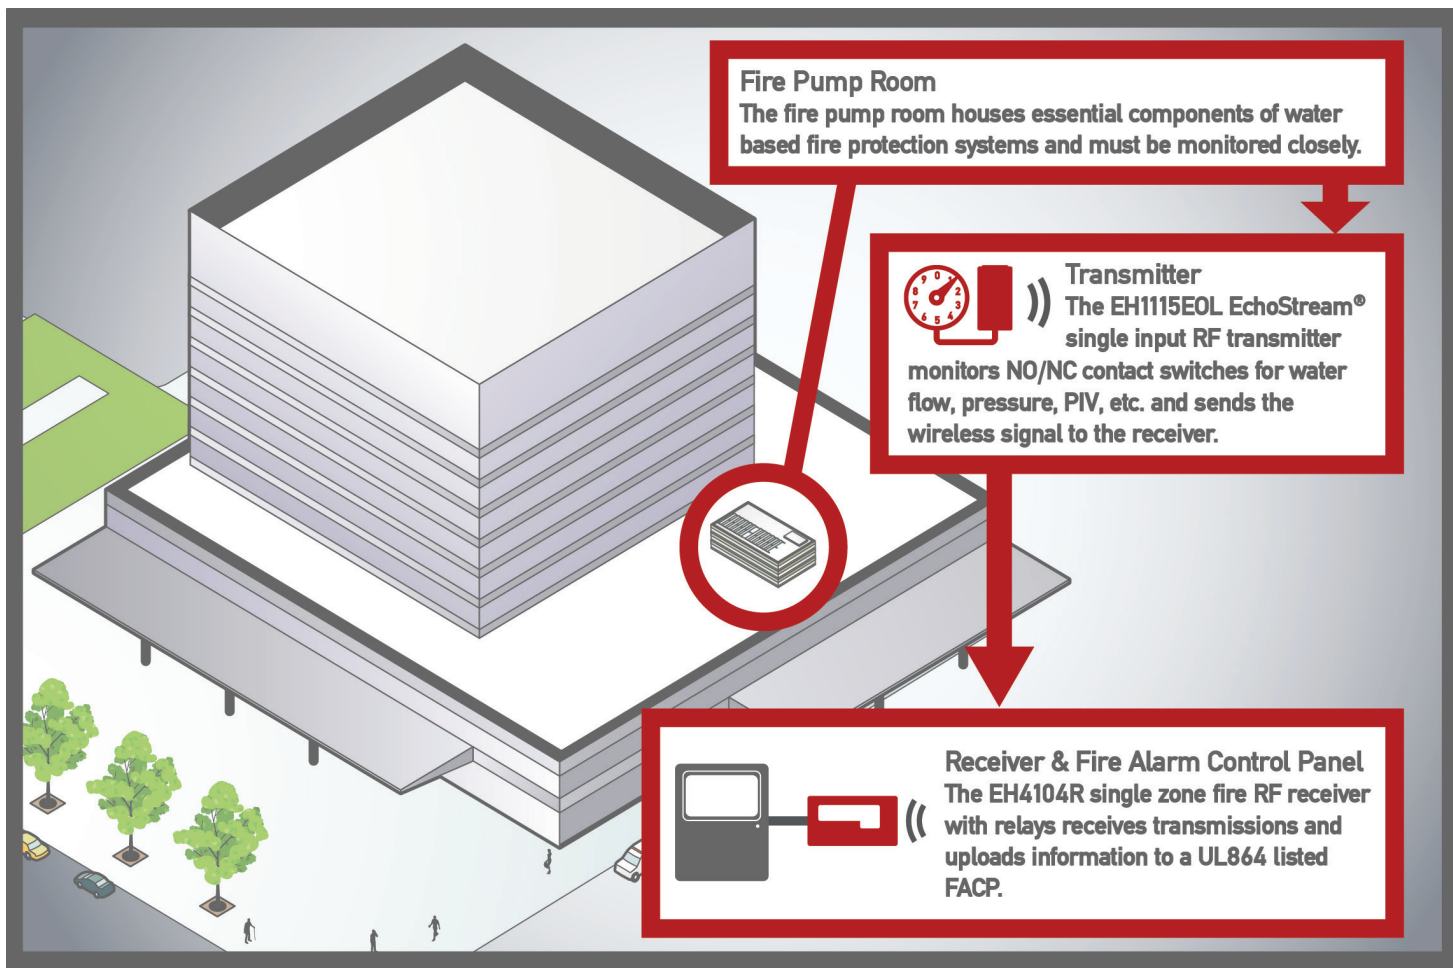

Receiver	Transmitters	Outputs	
		Alarm	Fault
EH4104R	1	1	4

(1) The above receiver will only work with "EH" devices, "EN" products are not compatible.

# Commercial Fire System Integration

For more than thirty years, Inovonics has covered government facilities, historic and national landmarks, critical infrastructure facilities, K-12 schools, banks, hospitals, and retail establishments using its highly reliable wireless radio platform. With each transmitter capable of up to 25,000 square feet of coverage and survey kits available to eliminate guess-work, Inovonics commercial fire systems are tailor made for commercial buildings.

## Commercial Fire Products

UL 864 Certified Devices  

### EchoStream® Single Input Fire RF Transmitter

The **EH1115EOL** single input fire RF transmitter is designed to monitor water flow and pressure in piping and post indicator valves to send an alert when a fire protection system has been activated. This transmitter can be used with any standard contact or sensor.

A 2.21K ohm end of line resistor is included and required for operation.

The **EH4104R** single zone fire RF receiver with relays is designed for use with the EH1115EOL to monitor water flow and pressure in piping and post indicator valves to send an alert when a fire protection system has been activated.

## System Tools

### Survey Kit & App

The **EN7017** survey kit and app reduces bid risk, decreases installation time, and builds credibility with clients. Quickly prepare accurate quotes for even the most complex jobs.

Mobile app available on Android and iOS devices.
