eCall Life Safety & Monitoring Solutions

The only dedicated wireless
platform built for life safety

The Inovonics Difference

UL 2560 & HIPAA Compliant

Meets the highest safety and privacy standards.

Dedicated Wireless Network

900 MHz mesh network trusted for 20+ years in communities nationwide. Works through concrete walls, across campuses, and anywhere Wi-Fi systems fall short.

Scalable Technology Infrastructure

Add sensors or switch providers without replacing your core infrastructure as your community needs evolve.

Purpose-Built Pendants

Custom pendants designed with direct input from seniors and caregivers.

Comprehensive Community Care

Resident eCall

eCall with advanced location features to help you locate residents in real time.

Fall Detection

Automated fall alerts, even when a resident can't press a button.

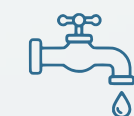

Activities of Daily Living

Track resident activity and get the data you need for routine wellness checks.

Staff Duress

Protect your staff and caregivers with discreet panic duress cards that go anywhere they do.

Environmental Monitoring

Leak detection and temperature monitoring sensors help prevent costly property damage.
